BEE Compliancy

Camperdown Environmental Services is proud to announce that during the latest BEE evaluation, we were certified a level 2 contributor. This achievement did not just happen but required a conscientious and dedicated effort by the management of *Camperdown* over a considerable period. The company does not regard the latest rating as a completed task but will strive to achieve an improved status in the immediate future.

Camperdown, where people matter!

Report Back From Ellisras

The branch had scarcely opened its office in *Ellisras* when it won a tender to clean one of the malls in town. Well done to our branch and may this be the first of many.

National Contract Cleaners Association

Camperdown Environmental Services has joined the NCCA and is now a proud member of the NCCA Gauteng branch. The NCCA was constituted in 1987 and is dedicated to developing and setting appropriate standards for the contract cleaning industry. The NCCA sets and maintains industry standards, develop guidelines and frameworks for skill development and provides professional and management expertise.

This again serves to confirm that *Camperdown* is continuously striving to reach new levels.

And More....!

Camperdown also recently won the contract to perform cleaning services at the Carnival mall in Brakpan. During the first month of operations, we received praise from not only every tenant in the complex but also from the public who could not believe the improvement.

Well done Boksburg!!

Watch this space!

More exciting developments are imminent. Our next newsletter will undoubtedly contain more news.
