

A cleaner today for a better tomorrow

Office Cleaning & Laundry Service

Camperdown Health & Hygiene has been providing daily cleaning services to a wide variety of customers over an extended period with an aim to exceed expectations all the time. Our staff is dedicated to specific locations which not only assists in them in becoming familiar with the areas they are responsible for, but also permits for the contractor to be able to direct our employees in performing their duties in the manner in which the contractor prefers. Our tailor-made program is, therefore, flexible to address the needs of our clients.

Only tried and tested cleaning chemicals are used, thereby, also ensuring disinfection. Quotes for carpet washing can be provided.

Our staff is fully trained and neatly uniformed at all times. We provide all the equipment required to ensure optimal efficiency. We give careful attention to detail and will regularly audit our service to ensure that we still comply with the original brief. Should problem areas be identified during audits, a full report, with proposed remedial action, will be handed to the customer.

When the cleaning staff go on leave, they are replaced by staff who had actually trained on the site. This ensures a seamless duty transfer.

An in-house laundry service, providing the full spectrum of washing and ironing required to ensure that uniforms are clean and free of any bacteria, has become an important issue to some of the major companies who cannot always guarantee that their staff will report for duty in acceptably clean uniforms. This is especially true in environments where staff is subjected to dirty work conditions such as mines.

Camperdown Health & Hygiene uses top of the range equipment, washing powder and other detergents to ensure clean clothing being re-issued.

Camperdown is in a position to supply industrial type washing machines and tumble driers at reasonable prices
